

# APG's Interface Family of Mobile Cash Drawer Solutions

## Wireless Ethernet and Wired Cash Drawers

### Ethernet Cash Drawers (Model Numbers: 470, 480, 482, 488, and 490)

- The APG NetPRO Cash Drawers are designed to no longer be a peripheral, but to serve as peer devices on a network
- Models 470 and 480: IP enabled cash drawers are available for connection to wired store networks and are supplied with an external power adapter
- Models 482 and 488: WiFi-enabled cash drawers may be connected wirelessly to the retailer's in-store wireless access point and are supplied with an external power adapter
- Model 490: Cash drawers are POE (Power Over Ethernet) enabled and no power adaptor is required
- Cash drawer discovery and configuration is simple with the APG NetPRO® Discovery and Configuration Utility. The cash drawer can also be discovered and configured programmatically
- Any drawer connected to the network may be claimed by the mobile device to ensure the mobile enabled cash transaction is attended
- Drawers may be claimed by a device using a barcode scan (488) or by a checkout associate using a biometric scanner (482)
- Features include on board data that can be used for loss prevention, asset management, remote tech support, and broadcast of mobile alerts

## HTML5 WebSocket Cash Drawers

### For Browser-Based POS (Model Numbers: 487 and 497)

- Is your retail data stored in the cloud? Store your software application in the cloud for easy accessibility and monitoring
- These cash drawers support the HTML5 WebSocket Protocol to enable drawer use in a browser-based application environment
- Biometric and bar-code claiming protect the cash drawer contents
- On the road or in the air? Store management can use any authorized device to access data
- Features include on board data that can be used for loss prevention, asset management, remote tech support, and broadcast of mobile alerts

## Bluetooth Cash Drawers

### When a Tablet and a Cash Drawer is All You Need (Model Number: 510)

- The Bluetooth device connects a printer-kick cash drawer so that it can be paired with a tablet
- Wirelessly synchronize and transfer data between a mobile device and cash drawer within a personal area network
- Proximity is achieved when the tablet comes within limited range of the Bluetooth device
- APG provides demonstration applications for Android, iOS, and Windows
- The BluePRO Bluetooth interface is MFi certified for iPhone, iPod, and iPad

Place it.  
Plug it.  
Pair it.
