APG CASH DRAWER[®]

MultiPRO[®] Interface

The MultiPRO[®] interface allows the drawer to be connected to many different POS printers by simply changing the external cable that is wired for that printer.

Consists of the 320 MultiPRO[®], 420 MultiPRO[®] II, and the 520 MultiPRO[®] III.

320 MultiPRO[®] cables are able to connect to virtually all of the 24v POS systems and receipt printers.

420 MultiPRO[®] II cables are able to connect to virtually all of the 12v POS systems and receipt printers.

520 MultiPRO[®] III cables are able to connect to virtually all of the POS systems and receipt printers either 12 or 24v of voltage.

Find your device on APG's Connectivity Guide at:
